

Course Outcomes for GEOL 111

The following are working course outcomes. These outcomes will be reviewed by the NWIC Curriculum Committee during the curricular review process in 2017 with the intent of creating and approving course outcomes.

At the completion of this course students will be able to:

1. Interpret geological processes
2. Characterize and interpret the nature of geological events in pacific northwest
3. Interpret and explain geological processes in pacific northwest and the world
4. Demonstrate appreciation and knowledge of scientific process and communication
